Photographers should never blindly follow a photograph taken with a cheap point-and-shoot digital camera. A picture taken with that kind of camera lacks the quality that a professional photographer brings to the table. A very useful feature to have is a way to copy and paste images. Use Windows Explorer or Mac Finder to copy images to the desktop, open Photoshop, and paste them into your editing document. This

The latest version of the program, CS6, was priced at $800; the regular price for anyone who wants Photoshop Elements is $300 to $350. Figure 5-12 shows an example of a typical package of the program. **Figure 5-12:** A full-screen sample showing a single layer of a photo. The Adobe website offers a tutorial that runs you through many

of Photoshop Elements features. It's quite thorough. The Photoshop Elements blog at `www.photoshop.com/blog/` has tons of great tips and tricks that you can use, even if you're not ready to start a digital photo book. If you're like most, you don't want to start with Elements, because it doesn't offer all the features of the full-featured version. with the more features of Photoshop CS6 and Photoshop CS6 Extended. Corel Paint Shop Pro Corel Paint Shop Pro (Figure 5-13) is the only other program besides Photoshop that enables users to create and manipulate digital images on the computer. **Figure 5-13:** Corel Paint Shop Pro is a paint-by-number program. What's New In?

Children growing up in poverty are more likely to become obese, find new data reveals. The research paper, published in the journal Pediatrics, shows that childhood obesity rates are highest in poorer families. Researchers at the Harvard Pilgrim Health Care Institute in Boston compared data collected between 1999 and 2000 in the Health and Retirement Study. The study analyzed the health records of almost 30,000 adults and 19,000 children.

Researchers analyzed the information to find the effects of food insecurity – low food access – and low parental education on childhood obesity. The findings show that children in food insecure homes are 27 percent more likely to be obese. Children from homes with less educated parents also have higher obesity rates – at 17 percent – than their counterparts whose parents have higher education. "We know that childhood obesity is a serious public health problem among children," said Dr. Helen Friedman,

first author of the study. "Our results suggest that some of the most vulnerable children are least able to meet their nutrient needs. "They can't turn to food to meet their needs, because they don't have the resources. "Children from these homes are at an increased risk of obesity-related health problems in the future," she added. The research was done in Massachusetts.Q: Overriding javascript function to work in more than one iframe I have two iframes which are independent, and each
