Main features: Convert video files to most popular formats Convert DVDs to AVI, MPEG, WMV, RM, and much more Preview your favorite media files Extract the playable DVD contents A simple and user-friendly interface Play DVD in a small window Advanced video encoder Remove or add files to the queue Compatibility: Windows XP, Vista, 7, 8, 10 File Copy should be easy to handle for every user. In this program, you can backup or move files, folders or entire disks. You can select what to copy and where to move the files. The program supports FTP, HTTP, SFTP, FTPS, SMB, NFS, Windows Share and Server Message Block connections. With FTP transfers, you can download files to your PC. With HTTP, you can use file and folder mirroring to keep your information in sync with your backup computer. You can also transfer files via SFTP or FTPS. Additionally, it's possible to manage the bandwidth, upload and download rates on the file transfer. The program will monitor your Internet connection and will inform you about the current speed and a few other things. When you're copying a file from a network location to another one, the program will also automatically check if the destination is accessible or not. If the target server is available, you'll be able to proceed with the copy process. If not, you'll be notified, too. You can also schedule file copies or automatic transfers with the built-in scheduler. All supported connection types and connection methods are checked automatically. For each of them, you can choose your preferred setting. Also, you can change file and folder renaming, encryption, compression, and more. File Copy Features Scheduler: You can schedule files, folders or entire disks for an automated backup. The program will check the Internet connection and notify you if a connection can be established or not. If the connection is available, the program will automatically perform a copy operation. FTP: You can download files from an FTP server by using the FTP manager. You can select the size of the download and the connection speed. HTTP: You can use the HTTP manager to mirror the files and folders on your PC and your backup computer. SFTP/FTPS/FTPES: You can use the SFTP/FTPS/FTPES manager to connect to an SF
