Put yourself in the shoes of the last surviving scavenger in a zombie infested world. The creepy bite of the undead virus has killed everyone, except for you! Run around shooting, driving and building your team. Build your base to shelter from the zombie swarms. Master strategic planning and your scavenging skills as you prepare for the inevitable zombie onslaught. Collect & Build! Building a good crew is the best defense against the zombie horde. As the night draws closer, arm your own arsenal. The last bullets will be purchased with your hard-earned loot from a relentless swarm of death. Survive Against The Swarm! Lead your team of survivors to victory in this tactical zombie shooter! Stick together and use your special building skills and abilities to emerge victorious from the war against the undead! Take care to protect your precious cargo - the baby can't fend for himself! Fear the Swarm! Go beyond just a simple zombie shooter! Why would you even want to play a simple shooter? Well, right now, there are soldiers that are just standing outside their base armed with nothing! All they need is some eyes in the sky and a gun to pick off those annoying rats. If you get a chance to take them out then that is awesome. Of course, these soldiers are the key to your survival, but they're not worth a single grain of rice. Aaaaand now they are dead. Build a base to protect you and your precious cargo. Plan your strategy. Team up with your friends to have a larger force! If this is all too much for you then we understand. Then we suggest you skip right to a nice peaceful life in the beautiful Mediterranean. In our zombie games, you are the last survivor of the apocalypse. Be sure to make a good team and act accordingly if you plan to survive. Why do they want to survive? You have to protect your family. They will do anything to protect their child. Have you ever thought that it would be better to be the leader of the zombies? I know I would! The leader of the zombies is actually a zombie. Little ZED! The answer is yes, little ZED! Are you a real survivor or a zombie? Find out for yourself in our zombie shooting game: SwarmZ! Massive & Weird Sandbox: Take control of an army of virtual units in this insane sandbox, learn to fight & survive in our c9d1549cdd

Play as two boy or girl characters. Defeat their respective bosses and collect their hearts to increase their stats. Defeat them in order to obtain their power to increase your own stats. When you die, your life points are saved to a small heart, which is obtained by defeating bosses. The more hearts you have, the more life points you have. If your health drops to zero, your life points will be saved. The coffee crisis is what is going on within each coffee you drink. As you continue to drink more and more coffee, your life points will decrease. The player will have to fight to keep their coffee stocked. This is a very humorous game. The two main characters are goofy looking. The quirky characters and goofy personality of the characters are endearing. You only get one life bar. As you continue to be hit, all your life points are added up. The gameplay is simple. You have a lifebar in the bottom left corner. If you run out of life points, you have a chance of dying. The game takes place in retro graphics reminiscent of the late eighties. The gameplay is fun. When you hit an enemy and collect their hearts, you will obtain their powers. You can use these powers to increase your stats. The gameplay is very simple. You have a lifebar in the bottom left corner. If you run out of life points, you have a chance of dying. The game takes place in retro graphics reminiscent of the late eighties. The gameplay is fun. Storyline: The story is very simple. Each little heart you collect will increase your health points. When your life points reach zero, you will lose that game and will have to start over. Your life points will be added back up if you beat the last enemy you killed. Pots keep track of your progress. The pots will restore your life points if you earn them with a heart you collected from the boss. This increases the life points on the pot. In the end, your pot will be full of hearts and you can then use the restore life points method. If you run out of pot filled hearts, you will have to start over. The best part about the story line is that you never have to worry about dying and having to start over. Pot of Success: If you can defeat the enemies you have to face, you can increase your life points. Your life points increase as you defeat

What's new in Galactic Lords:

Menu Tag Archives: melody Post navigation So had I mentioned I had some interest in doing some pentatonic scales that were a bit more than just the common two of major, minor and sair? I'm surprised you didn't notice that... or even over the last month or so during my summer-inspired break. Mind you, I do have a suspicion that I may have been planning to leave almost all music off my blog since my head is buried under so many projects it's very hard for me to find time to fully cover one or the other properly. Poor Emily is going to be extremely upset. So anyway, I have been beating around the bush, preparing to share some very specific and some awfully broad advice on what they are: Two of the specific things have to do with scales and the other two with chords. Suffice to say that some of the broad advice I hope to share will have a little thing to do with chords and melody too. Let me start by listing for you the pros and cons of pentatonic scales more than the common two... the major and minor scales. The Pros of Pentatonic Scales: – Easy to play – a dirty pentatonic scale is simple and almost natural – Intuitive – a pentatonic scale can sound just as good, if not better, than a major or minor scale – Convenient – if you're ever in a jam without a real, working knowledge of the scale, a pentatonic scale is probably the best alternative to back your improvisation – A useful tool – you can take a pentatonic scale and use it to improvise over quickly and easily. This includes the use of what I like to call pentatonic fills, which usually involve some sort of movement within a pentatonic scale – Quick to put together – sometimes a simple pentatonic scale can make your problems go away quicker The Cons: – Not as interesting – you may want to listen to blues and blues-derived music to hear scales that use the minor, major and other modes, but in jazz, the pentatonic scale is probably the least used scale. – Not useful for improvisation – lets face it, going beyond a scale degree is hard for most of us. We have to think hard if we're in a hurry to reproduce something. This creates the need for some kind of abbreviated concept
