Airport Simulator 3: Day & Night challenges players to take control of an airport and to plan, manage and control a successful flight schedule! Maximise your profits and keep your passengers happy by expanding and renovating your airport and providing first class services! After putting an airport in your pocket, the challenge is beginning! Players are initially presented with a prototype version of the game that contains only 8 airports, but they can extend the airport network by downloading additional airports from the internet. This open-ended expansion system allows players to create their own airports and connect them with each other. The additional airports can be used as destinations, intermediate hubs or starting and ending points for flights. The simulation also includes fully operational airports from Germany, the Netherlands, Spain, Portugal, France, the United Kingdom, Canada, Australia, Sweden and Iceland. You are the CEO and manager of the fictional Berraha Airport & Airport Service LLC. You decide on which flights are worth carrying, you are responsible for the quality of the services and can manage the staff and their tasks. High tech equipment and impressive vehicles are at your disposal to create the perfect airport and ensure you retain your position as the most successful airport in the world! There are a number of medical conditions that are associated with a deficiency in the level of growth hormone or other hormones having growth-promoting properties in growth hormone deficient humans and other mammals, as well as other animals. Such conditions include Turner's Syndrome, Prader-Willi Syndrome, idiopathic short stature, body asymmetry, childhood obesity, AIDS-related complex and wasting. More typically, however, growth hormone deficiency is associated with normal growth but otherwise normal development of an individual. Such individuals are not severely emaciated, but rather are of normal weight for their age. Another commonly recognized growth-promoting hormone is IGF-I, which is approximately 98% homologous to growth hormone, although it has different bioactivity (Charkowska et al. 1992 J. Clin. Endocrinol. Metabol. 71:1301-1306). IGF-I deficiency, both in human and animal models, is often correlated with growth hormone deficiency. Several methods are available to treat growth hormone deficient humans and other mammals, among them growth hormone therapy, epoprostenol, and administration of IGF-I. Other methods include pituitary irradiation, administration of insulin-like growth factor (IGF) receptor antagonists, and administration of IGF-I or

VRCURATOR is an "entrance level" VR experience available on Vive. It will work with any headset, PlayStationVR or OSVR, but is currently only on Vive and VivePro with the High-End Audio Pack. You experience the world as if you are in it, using the "co-presence" voice effect. You can have up to two people join an experience using the included headset, and you can even give voice prompts (or just be silent) to the other participants. Because, not everyone may be a natural "conversationalist" and may need a little help. Help is on the way, with additional modulations to customize the experience to the user. The software has only been tested on a Vive Pro with the High-End Audio Pack, and as such, this particular version will only work on these headsets. Those who can't get a headset to hook up to their computer will be disappointed, but others may be able to go "virtual" with the free VRCURATOR app! Disclaimer: I'm not a professional sound engineer. I've got a few years of playing around with audio equipment, but I'm just a guy who likes to goof off and play with his products. That said, my audio equipment has been used in some of the funniest situations and I hope you find some of the effects funny too. If not, I've got some good songs in my audio library waiting for you to use them for your good sound engineering! I'm developing a web app for which I need a static files storage (icons, css, javascript, etc) but I don't want to add them to the database. I think about a content file table having the file name as its primary key and including its location in another field but it's hard to catch the new file names if I use that. What's new:

The cage was loaded onto a large and mercifully stable-looking animal -- obviously a donkey, which is not at all what it appeared at first to be -- and pushed into the converted barn office of the horse trainer's other operation, the cavalry rehabilitation academy for military horses and mules. The police drug-sniffing dog attacked the animal's withers -- meaning, the place between the shoulders where the hide is still attached to the body, not the padding hung on a rack just below the shoulders, thus the animal's name, "foxtrot." After a rocky start, in which the horse was set upon by the other donkey and taunted and berated, the animal was corralled, gently moved inside a makeshift stalls, and neutered. Why would it have been a mule, you ask? I wondered the same thing. Whoops. That is a question: look it up. The answer is The Founding Fathers. Not all colonists were in favor of a war of conquest that some England had forced them to undertake. The importation of 100,000 African slaves was the answer of those people who wanted to live free of the British Commonwealth, but not free of the British slave trade. How's that sound? You wouldn't be living "free," if you were owned by the person who owned your family and were reminded of that bondage every day. He gave you life, he owns your life, and you own nothing but what you earn. (And earn in the hell of the market.) Of course, the Founding Fathers had no idea what they were inventing. They also had no idea of the impact of their new invention and tax system on their former slave-owners and their former chattel-owners, who in various ways felt their liberties and property rights being taken away under the guise of "liberty and justice for all." They were supposed to be servile and gentle of spirit, and their overt and covert actions reflect that. Today, modern democratic societies are filled with people who -- whatever their nation and whatever their flag -- have adopted the same spirit of -- if not outright ownership -- of their fellow citizens. It's because of the flawed idea of democratic socialism and the concern about Terrorism (or war terror, if you will) that has turned today's Canadians into soulless sheep -- for the eventual benefit of a displaced minority minority of people who stood this nation in its
