(we answer your question with a question) Are you ready to rock? Fine, but don't forget to buckle your seatbelt... At Cosmografico, we are crazy about DJ'ing and we are committed to promote all the people and artists involved in the industry. For this reason, we partner with a number of official DJ's and producers such as HJ AND PROMISING PRODUCERS...It's time to find out how how did it all start and what are the goals. At Cosmografico we want to make sure that we do not make the mistake of other publications that fall into the trap of making a career out of knowing too much about everything, end up being useless and losing its fun. DJ'ing and doing production is fun, we just want to make sure it's fun, so we leave you to the adventure. We want to be your ally, your help, and guide in the process of discovery. We hope that by following our story, you can contribute in bringing more fun and joy into the equation. Welcome to the family! As a DJ, I am a long time resident of the Hudson Valley of New York, a lively atmosphere and warm-hearted residents. Whenever I return to Hudson Valley, I discover little interesting secrets from years ago and magically connects me with persons and places that define my life and my city. So my DJing began from my own memories and experiences. I lived in a city of contradictions. There were the fun places that hold partying all night and the pleasant and quiet places that have the nice atmosphere that attract tourists to enjoy the city and the way of life with the locals. The fast cars and the long time automobiles that give me and many other the whole experience of city driving. The theaters and the dancing places where my memories are immortal. The community of ethnic groups that fed my fascination with different cultures and flavors. The small streets where a close friend died and then was reincarnated in a mysterious way. So, the DJing began from the memories and the places where I lived in my life. Until the moment
